Chulalongkorn University

SUMMARY

I am currently transitioning into a career in **front-end development**. I have a background in SAP FICO and four years of experience in the automotive industry, specializing in Dealer Management System (DMS). I have actively been learning front-end and full-stack development online and have successfully completed practical projects. You can view my portfolio website, which includes all my projects, at <https://phornhathai.netlify.app>.

SKILLS

CSS · HTML5 · Figma · Javascript ·

Typescript · Node js · React js ·

Express js · MySQL · SAP FI-CO ·

Github · DMS System

STRENGTHS

🧵 HTML5 , CSS , Javascript

"I enjoy decorating websites to make them look good all the time."

HOBBIES

★ Reading books, watching animations, and traveling to natural places.

Why are you proud of this achievement?

LANGUAGES

EN Intermediate

Japanese Beginner

PASSIONS

💎 Self-Discipline

My passion for being a front-end developer has led me to immerse myself in the world of web development, where beautiful websites are constantly created. Whether it's on YouTube, Twitter, or elsewhere, I've noticed that most people dedicate their time to practicing web development. So I believe there's nothing that can't be accomplished if others can do it as well.
